participated successfully in the Seminar

Good Research Practice for Doctoral Researchers

Date: August 21, 2023
Length: 8 work units (à 45 Minuten)
Trainer: Dr. Christian Dumpitak, Trainer for Higher Educational Teaching, iGRAD, HHU

The seminar is a fundamental introduction to the principles for safeguarding good research practice based on the recommendations of the Deutsche Forschungsgemeinschaft (DFG). It focuses on the perspectives of doctoral researchers by introducing and discussing the following topics:

I. Basics of responsible conduct and ethical principles in science

- Introduction: Values, virtues, potential problems and conflicts in research contexts
- Basic recommendations of the DFG, relevant codices and regulations for safeguarding good research practice and research integrity
- Research misconduct: Examples, elements of offense and consequences, procedures for coping with Research misconduct

II. General responsibilities of scientists in context of:

- Data collection and research documentation
- Publication process, authorship and review of manuscripts
- Supervision: Expectations, duties and roles
- Organizational culture: Challenges of collaboration and communication in teams and in research collaborations. Strategies to prevent and to manage problems and conflict in everyday scientific environment
- Procedures in case of suspicion and relevant contact persons

III. Important specific responsibilities:

- Important issues prior to any data collection, Authorization or permission relevant research
- Research with animals: Basic aspects of responsibility and contact persons
- Research with humans: Basic aspects of responsibility and contact persons
